

Hoshen Lichi

Gedera, Israel | 052-6330171 | lichi190899@gmail.com | [LinkedIn](#)

Summary

AI product-oriented practitioner with 3+ years of experience in business needs analysis, data analysis, and hands-on AI implementation. Experienced in owning end-to-end solutions, from problem discovery and workflow analysis to building AI-driven products and measuring impact. Skilled at translating operational challenges into scalable product solutions, designing user-centric workflows, and leveraging LLMs, automation tools, and data analysis to drive measurable business outcomes.

Projects

AI Implementation System (pick-IT) | KERNELiOS | AI Practicum

- Identified a key bottleneck in agricultural R&D workflows caused by fragmented data and inconsistent classification. Defined product vision and built an AI-powered system to standardize data collection and improve decision-making.
- Designed user-centric workflows for researchers and technicians, integrated into daily processes. Delivered a real-world MVP, increasing throughput by 20% and improving data reliability.

Full-Stack Operational Dashboard | KERNELiOS | AI Practicum

- Identified lack of visibility across tools impacting team efficiency. Designed and built a centralized AI-driven system integrating Slack, Jira, Confluence, and Calendar.
- Created real-time dashboards to track project velocity and team synchronization. Enabled data-driven decision-making by transforming fragmented data into actionable insights.

Professional Experience

PM | IDF (Classified) | 2023–2025

- Identified operational inefficiencies and defined product requirements for internal data-driven solutions used by **50+** stakeholders.
- Owned end-to-end lifecycle from problem definition and requirement gathering to solution design, implementation, and adoption.
- Designed operational dashboards and automated alert systems, reducing manual workload from **12 hours to 2 minutes per week**; awarded Certificate of Excellence for exceptional impact.
- Managed and prioritized backlogs in a Jira-like military system, translating operational needs into structured tasks and aligning delivery with impact.
- Worked in Agile, collaborating with cross-functional teams to drive continuous iteration, measuring success through efficiency gains, faster response times, and multi-department adoption.

Data Analyst | IDF (Classified) | 2022–2023

- Analyzed large datasets using SQL and Pandas to identify operational patterns and inefficiencies.
- Optimized data queries and centralized data from multiple systems, enabling faster access to reliable insights and reducing manual effort.
- Translated data insights into actionable recommendations for senior stakeholders.
- Supported decision-making processes through data validation and reporting.

Skills & Tools

- **AI & Automation:** LLMs (OpenAI, Anthropic), Prompt Engineering, AI Agents, n8n, Make, Workflow Automation, Custom GPTs, AutoGen.
- **Technical and data:** Python (Pandas), SQL (querying & analysis), Data Validation, API Integrations.
- **Tools:** DataGrip, Tableau, Confluence, Jira, Office Suite.
- **Professional Skills:** Technical Implementation, Project Management, Stakeholder Management, Agile Methodology, problem definition, solution design.
- **Languages:** Hebrew (native), English (fluent).

Courses & Certifications

- KERNELiOS | AI Practitioner (2026)
- Campus IL | Project Management, Introduction to Python

Education

Full Matriculation Certificate (Bagrut), Ramon High School (2021) Certificate of Excellence, MOE

Community Involvement

- **Etgarim (2024–Present) – Instructor in Adaptive Diving Program**
Leading safety and guidance in complex, high-responsibility environments.
